## **Model Number**

#### OHV200-F221-B15

Handheld reader with Bluetooth for all common 1-D and 2-D codes

## **Features**

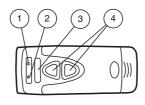

- All common 1-D or 2-D codes can be read
- · Wireless Bluetooth connection
- · Dual lens for large read range
- Reads from reflective surfaces
- · Programmable with JavaScript
- Batch mode for collecting data on the handheld
- Audible, tactile, and visual user feedback
- Replaceable battery with status indicator
- Degree of protection IP65

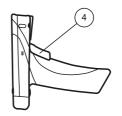

## **Function**

The OHV200 handheld is a compact handheld reader for all common 1-D and 2-D codes. Special technology to prevent glare allows the device to accurately read codes on highly reflective surfaces. With its patented dual lens and a resolution of 1.2 million pixels, it can read both small and large codes from a wide range of distances. A different-colored target projection makes it easier to see the relevant code. Feedback comes in the form of a visual or audible signal or a vibration.

Using the Vision Configurator software, rule sets can be created for formatting read results without the need for extensive programming work. This facilitates integration into ERP systems. The read data is transferred via the Bluetooth interface or by plugging the handheld reader into the charger. Thanks to its robust housing and IP65 protection, the handheld reader is also suitable for outdoor use.
