

Butterfly valves manual & pneumatically actuated

- Self-lubrication bearing for longer service life
- Through shaft design
- Low torque high pressure design
- Rugged actuator mounted to ISO pad (standard)

Type 2671 can be combined with...

Type 8793
Digital Process
Controller

Type 2672
Butterfly valve with
electric actuator

Type 1061
Accessory for
pneumatic rotary
actuators

Type 6519 Namur
Pilot valve, direct
mount to actuator

Protective hood
For field mount
positioners

Type 1061
Limit box

2/2 way Butterfly Valves used for control and on/off operations. Due to the fact that the valves are available with different body types (wafer or lug type) and materials, they perfectly meet the requirements of diverse applications and processes.

Usually they are used in application fields such as, for example, the water industry, power generation, pulp and paper, mining, food & beverage, environmental and mechanical engineering.

Further features and benefits are:

- Through shaft for self centering disc --> even wear and low torques.
- Can be installed in any desired position.
- Maintenance-free; simple to disassemble

Applications:

- Water & wastewater applications
- Food & beverage
- Chemical and petrochemical
- Gas & energy applications
- Mineral processing, steel mills

Technical data	
Orifice	DN50 to 600
Body	Wafer & Lug
Body material	Cast iron, ductile iron, stainless steel & PVC
Disc material	316 S/S for metal valves, PVC for PVC
Seal material	EPDM (NBR, FKM on request)
Medium temperature	-10°C to +120°C Metal / 0-60°C PVC (pressure, media and material dependent)
Medium Pressure	max. 16 bar* Refer to ordering chart
Flange connections	Wafer - Table D,E, ANSI1150 & Din standard Lugged - Table E (other flanges available)
ISO top flange	EN ISO 5211

Technical data: valve

Kv Value

- The Kv-value (m³/hr) is the flow of water at a temperature of 5°C to 30°C (41 °F to 86 °F) at 1bar.
- Permissible velocity of flow Vmax 4.5 m/s for liquids and Vmax 70 m/s for gases.
- The throttle function is linear at an angle 30° to 70°.
- Avoid cavitation!

For further values, please contact our engineers.

Technical data: Rilsan coated pneumatic actuator

Rilsan coated pneumatic actuator

Bürkert's range of pneumatic actuators for quarter turn valves fulfil a wide variety of on/off process applications. Available in double acting and spring return configuration, these actuators deliver exceptionally long service life.

The actuator shown here is extremely protected against corrosion by double coating of epoxy (cataphoresis) and Rilsan (internal & external). All materials are resistant to oxidation (silicone free); the actuators are even rated to be water-actuated. This level of protection suits the valve system to field deployment in extreme conditions.

A wide selection of accessories is available including:

- Limit switches
- Positioners
- Manual override

Actuators require pilot solenoid valve; see accessories list.

Ordering chart for accessories for Type 8805 (to be ordered separately)

Type 8805 pneumatically actuated butterfly valves require pneumatic piloting. Standardised piloting kits for Type 8805 shown below. Variations available (e.g. all voltage variations available).

Item description		ID No	
		24V DC	240V AC
 For direct acting type Type 6519 pilot solenoid valve with namur type service port and G¼" air ports. Normally closed 3/2, 5/2 Way circuit function. PA body with stainless steel inserts. Type 2508 DIN Plug, with LED. Silencer, sintered bronze table type (male) for G¼". Tubing, flexible nylon (Rilsan), per meter		131425	131428
		008360	008362
		781889	
		92103280	
 For spring return type Type 6014 pilot solenoid valve with G¼" service port and G¼" air ports. Normally closed 3/2 Way circuit function. PA/Brass/Aluminium body with FKM seal. Type 2508 DIN Plug, with LED. Stainless steel cap nut, for additional protection of the exhaust air channel from damp penetration, insects, etc. Tubing, flexible nylon (Rilsan), per meter		424103	424107
		008360	008362
		649554	
		92103280	
 Airbox 3/2 way with Mechanical Feedback Airbox 5/2 way with Mechanical Feedback Airbox 3/2 way with Inductive Feedback Airbox 5/2 way with Inductive Feedback		773139	
		773140	
		773141	
		773142	

*Ex Options available on request.

Selection of Type 8805 pneumatically actuated butterfly valve accessories; including feedbacks, digital positioner & process controller and stainless steel protective hood.

Item description		ID No
 Top mounted switch box, Size 1. For visual position indication. Aluminium die cast, polycarb. Top mounted switch box, Size 2. For visual position indication. Aluminium die cast, polycarb. Top mounted switch box, Size 3. For visual position indication. Aluminium die cast, polycarb. *NB All units on ordering chart indicate which size switch box suits with 'Optional Accessory Size'		92150858
		92150606
		92150607
 Type 8793 electropneumatic positioner with integral PID controller for quarter turn valves. Spring Return & Double Acting actuator type. Operating voltage 24V DC. Type 8792 electropneumatic positioner for quarter turn valves. For Spring Return & Double Acting actuator type. Operating voltage 24V DC.		92133833
		92133832
 Dual proximity switch feedback for mount onto quarter turn valves. Size 1. Dual proximity switch feedback for mount onto quarter turn valves. Size 2. *NB Ordering chart indicates 'Optional Accessory Size' Size 3.		92146486
		92146487
		92146860
 Protective hood for quarter turn valves, stainless steel. Designed for protection from weather and sun to deliver long service life.		92133834
